

ME-EL1000-E

1 Ton Electric Wheel Loader

ME-EL1000-E is an electric wheel loader in the 1,000 kg rated-load class for low-noise and zero-tailpipe-emission handling.

Confirmed and Configuration-Based Specifications

Parameter	Value
Rated load class	1,000 kg
Power type	Electric
Machine type	Compact wheel loader
Battery and charger	Confirm duty cycle and destination voltage
Attachment interface	Confirm for selected application
Final dimensions and weights	Confirmed on formal technical offer

Configuration and Order Confirmation

Final specifications depend on the selected engine, battery, emissions package, cab, tires or tracks, hydraulics, attachments, controls and destination-market requirements. The formal technical offer and signed order confirmation take precedence over this overview.

Request a Technical Offer

Send the working application, required capacity or width, site conditions, attachments, destination country and expected quantity to sales@merimachinery.com.

Document status: Product-family technical overview. Verify every final value against the confirmed production configuration before purchase, resale, compliance submission or operation.
