

**ME-FL2500-D**

## 2.5 Ton Off-Road Forklift

ME-FL2500-D is a MERI off-road forklift for professional site, farm or municipal operations.

### Confirmed and Configuration-Based Specifications

| Parameter                    | Value                               |
|------------------------------|-------------------------------------|
| Rated load class             | 2,500 kg                            |
| Equipment type               | Off-road forklift                   |
| Power / drive                | Diesel                              |
| Carrier or interface         | Confirm before quotation            |
| Hydraulic requirements       | Confirm for selected carrier        |
| Final dimensions and weights | Confirmed on formal technical offer |

### Configuration and Order Confirmation

Final specifications depend on the selected engine, battery, emissions package, cab, tires or tracks, hydraulics, attachments, controls and destination-market requirements. The formal technical offer and signed order confirmation take precedence over this overview.

### Request a Technical Offer

Send the working application, required capacity or width, site conditions, attachments, destination country and expected quantity to [sales@merimachinery.com](mailto:sales@merimachinery.com).

Document status: Product-family technical overview. Verify every final value against the confirmed production configuration before purchase, resale, compliance submission or operation.
