

ME-RM750-R

750 mm Remote Control Power Tiller

ME-RM750-R is a remote control tracked power tiller for operator-distance soil preparation and site work.

Confirmed and Configuration-Based Specifications

Parameter	Value
Working-width class	750 mm nominal class
Control type	Remote control
Machine type	Tracked power tiller
Power system	Confirm selected configuration
Working depth and tooling	Confirm for soil and operation
Final dimensions and weights	Confirmed on formal technical offer

Configuration and Order Confirmation

Final specifications depend on the selected engine, battery, emissions package, cab, tires or tracks, hydraulics, attachments, controls and destination-market requirements. The formal technical offer and signed order confirmation take precedence over this overview.

Request a Technical Offer

Send the working application, required capacity or width, site conditions, attachments, destination country and expected quantity to sales@merimachinery.com.

Document status: Product-family technical overview. Verify every final value against the confirmed production configuration before purchase, resale, compliance submission or operation.
