Configuration and Order Confirmation

Final specifications depend on the selected engine, battery, emissions package, cab, tires or tracks, hydraulics, attachments, controls and destination-market requirements. The formal technical offer and signed order confirmation take precedence over this overview.

Request a Technical Offer

Send the working application, required capacity or width, site conditions, attachments, destination country and expected quantity to sales@merimachinery.com.

Document status: Product-family technical overview. Verify every final value against the confirmed production configuration before purchase, resale, compliance submission or operation.
