Nominal capacity / class	500 L nominal
Equipment type	Self-propelled agricultural sprayer
Power system	Diesel
Boom, nozzle or outlet	Confirm application requirement
Pump, filtration and controls	Confirm selected configuration
Destination documentation	Confirmed before order

Configuration and Order Confirmation

Final specifications depend on the selected engine, battery, emissions package, cab, tires or tracks, hydraulics, attachments, controls and destination-market requirements. The formal technical offer and signed order confirmation take precedence over this overview.

Request a Technical Offer

Send the working application, required capacity or width, site conditions, attachments, destination country and expected quantity to sales@merimachinery.com.

Document status: Product-family technical overview. Verify every final value against the confirmed production configuration before purchase, resale, compliance submission or operation.
