

ME-TG100-D

1,000 mm Power Tiller

ME-TG100-D is a diesel power tiller for land preparation, cultivation and inter-row work.

Confirmed and Configuration-Based Specifications

Parameter	Value
Working-width class	1,000 mm nominal class
Power type	Diesel
Equipment type	Power tiller
Working depth and tooling	Confirm for soil condition
Tire / track and controls	Confirm selected configuration
Final dimensions and weights	Confirmed on formal technical offer

Configuration and Order Confirmation

Final specifications depend on the selected engine, battery, emissions package, cab, tires or tracks, hydraulics, attachments, controls and destination-market requirements. The formal technical offer and signed order confirmation take precedence over this overview.

Request a Technical Offer

Send the working application, required capacity or width, site conditions, attachments, destination country and expected quantity to sales@merimachinery.com.

Document status: Product-family technical overview. Verify every final value against the confirmed production configuration before purchase, resale, compliance submission or operation.
