

ME-TL2500-D

2.5 Ton Telescopic Loader

ME-TL2500-D is a diesel telescopic loader in the 2,500 kg maximum-lift class for stacking, bale handling and elevated loading.

Confirmed and Configuration-Based Specifications

Parameter	Value
Maximum lift class	2,500 kg
Power type	Diesel
Machine type	Telescopic boom loader
Lift height and reach	Confirm required working position
Attachment and hydraulics	Configuration options available
Final load chart	Issued for confirmed configuration

Configuration and Order Confirmation

Final specifications depend on the selected engine, battery, emissions package, cab, tires or tracks, hydraulics, attachments, controls and destination-market requirements. The formal technical offer and signed order confirmation take precedence over this overview.

Request a Technical Offer

Send the working application, required capacity or width, site conditions, attachments, destination country and expected quantity to sales@merimachinery.com.

Document status: Product-family technical overview. Verify every final value against the confirmed production configuration before purchase, resale, compliance submission or operation.
